

SAFE SAMPLING SYSTEM

For Liquid AC

Easy installation on any brand equipment

Protects against hot liquid splatter

Fits up to one gallon sample container

The Heatec Safe Sampling System protects you from burns when taking samples of your liquid AC. Available in multiple pipe sizes to fit your current system. Contact us for a quote.

Valve Handle

Prevents fill operation when the door is open for added safety.

Jumper Connection

Pre-installed hot oil jumper connections for easier installation.

Sample Box

Holds a sample container; up to one gallon capacity. The clear door provides visibility to prevent over filling.
