**FOR IMMEDIATE RELEASE****Astec Set to Showcase its Combined Strength at World of Concrete 2022**

*RexCon, CON-E-CO and BMH Systems brand concrete equipment to be featured in the Astec booth.*

**CHATTANOOGA, Tenn., November 16, 2021** – Astec opens an exciting new chapter at the World of Concrete 2022 as its three concrete brands, RexCon, CON-E-CO and BMH Systems, will come together as Astec. The iconic brands will be found at booth #N737 at the show being held January 18-20 in Las Vegas, Nevada, USA.

Until recently, RexCon, CON-E-CO and BMH Systems, presented themselves as separate subsidiary businesses. Now these three powerful concrete companies are united under the Astec brand while retaining their legacy in the product names.

At the booth, learn more about Astec's comprehensive line of products for concrete production through a display that includes full-size plants, detailed scale models and an interactive virtual experience. Products featured include the RexCon Mobile 12 and CON-E-CO LO-PRO Transit Mix Plants, a RexCon tilt mixer, and a BMH Rollmaster horizontal reversing mixer.

Visitors can also learn more about the strategic partnership with [CarbonCure Technologies](#) whose products enable concrete producers to reduce their carbon footprint without sacrificing its quality and strength. CarbonCure injects CO<sub>2</sub> in the batching process resulting in a high-performing concrete while utilizing less cement. The exciting partnership is a step forward for Astec as the company strengthens its commitment to sustainability by allowing us to offer our customers sustainable building solutions. Visit the booth to see how CarbonCure Technologies easily integrates with our concrete plants to reduce embodied carbon at the front of a project's lifecycle.

Astec looks forward to meeting with new and prospective customers during World of Concrete 2022.
